LOCATORS

Nation United States Latitude 393711N
State Colorado Longitude 1053604W

Quad Code Quad Name

39105-E5 Harris Park
39105-F5 Idaho Springs

County

Clear Creek (CO)

Watershed Code Watershed Name

10190002 Upper South Platte
10190004 Clear

SITE DESCRIPTION

Minimum Elevation - Feet - Meters
Maximum Elevation - Feet - Meters

Site Description

The area is characterized by grassy alpine benches surrounded by fellfield, dominated by *Kobresia myosuroides*.

SITE DESIGN

Site Map Y - Yes Mapped Date 01/31/1996
Designer Ellingson, A.R.

Boundary Justification

Boundary encompasses several colonies that make up this invertebrate occurrence and the interspersing alpine habitat. Boundaries extended to take in bristle cone pine occurrences around Lincoln Lake.

Primary Area 1,672.12 Acres 676.69 Hectares

SITE SIGNIFICANCE

Biodiversity Significance Rank B2: Very High Biodiversity Significance

Biodiversity Significance Comments

The biodiversity rank is based on an excellent (A-ranked) occurrence of a globally imperiled (G2/S2) plant community, *Pinus aristata* / *Trifolium dasyphyllum* woodland. The site also supports a good (B-ranked) occurrence of the state rare (G5/S3) invertebrate, polixenes arctic (*Oeneis polixenes*).

Site Code S.USCOHP8*3595

These data are a product and property of Colorado State University, Colorado Natural Heritage Program (CNHP). These data are strictly "on loan" and should be considered "works in progress". Data maintained in the Colorado Natural Heritage Program database are an integral part of ongoing research at CSU and reflect the observations of many scientists, institutions and our current state of knowledge. These data are acquired from various sources, with varying levels of accuracy, and are continually being updated and revised. Many areas have never been surveyed and the absence of data in any particular geographic area does not necessarily mean that species or ecological communities of concern are not present. These data should not be regarded as a substitute for on-site surveys required for environmental assessments. Absence of evidence is NOT evidence of absence. Absence of any data does not mean that other resources of special concern do not occur, but rather CNHP files do not currently contain information to document this presence. CNHP is not responsible for whether other, non-CNHP data providers have secured landowner permission for data collected.

These data are provided for non-commercial purposes only. Under no circumstances are data to be distributed in any fashion to outside parties. To ensure accurate application of data, tabular and narrative components must be evaluated in conjunction with spatial components. Failure to do so constitutes a misuse of the data. The Colorado Natural Heritage Program shall have no liability or responsibility to the data users, or any other person or entity with respect to liability, loss, or damage caused or alleged to be caused directly or indirectly by the data, including but not limited to any interruption of service, loss of business, anticipatory profits or indirect, special, or consequential damages resulting from the use of operation of the data. Data users hereby agree to hold CNHP, Colorado State University, and the State of Colorado harmless from any claim, demand, cause of action, loss, damage or expense from or related to data users use of or reliance on the data, regardless of the cause or nature thereof, and even in the event that such cause is attributable to the negligence or misconduct of CNHP.

These data are provided on an as-is basis, as-available basis without warranties of any kind, expressed or implied, INCLUDING (BUT NOT LIMITED TO) WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT. Although CNHP maintains high standards of data quality control, CNHP, Colorado State University, and the State of Colorado further expressly disclaim any warranty that the data are error-free or current as of the date supplied
