ROCKY MOUNTAIN SUBALPINE-MONTANE RIPARIAN SHRUBLAND

ACER GLABRUM TEMPORARILY FLOODED SHRUBLAND ALLIANCE
Acer glabrum Drainage Bottom Shrubland

ALNUS INCANA SEASONALLY FLOODED SHRUBLAND ALLIANCE
Alnus incana - Salix (monticola, lucida, ligulifolia) Shrubland
Alnus incana / Equisetum arvense Shrubland

ALNUS INCANA TEMPORARILY FLOODED SHRUBLAND ALLIANCE
Alnus incana - Salix drummondiana Shrubland
Alnus incana / Calamagrostis canadensis Shrubland
Alnus incana / Cornus sericea Shrubland
Alnus incana / Mesic Forbs Shrubland

BETULA NANA SEASONALLY FLOODED SHRUBLAND ALLIANCE
Betula nana / Mesic Forbs - Mesic Graminoids Shrubland

BETULA OCCIDENTALIS SEASONALLY FLOODED SHRUBLAND ALLIANCE
Betula occidentalis / Mesic Graminoids Shrubland

BETULA OCCIDENTALIS TEMPORARILY FLOODED SHRUBLAND ALLIANCE
Betula occidentalis / Cornus sericea Shrubland
Betula occidentalis / Maianthemum stellatum Shrubland

CORNUS SERICEA TEMPORARILY FLOODED SHRUBLAND ALLIANCE
Cornus sericea / Heracleum maximum Shrubland
Cornus sericea / Mesic Forbs Shrubland

DASIPHORA FRUTICOSA TEMPORARILY FLOODED SHRUBLAND ALLIANCE
Dasiphora fruticosa ssp. floribunda / Deschampsia caespitosa Shrubland

SALIX BEBBIANA TEMPORARILY FLOODED SHRUBLAND ALLIANCE
Salix bebbiana / Mesic Graminoids Shrubland
Salix bebbiana Shrubland

SALIX BOOTHII SEASONALLY FLOODED SHRUBLAND ALLIANCE
Salix (boothii, geyeriana) / Carex aquatilis Shrubland
Salix boothii / Calamagrostis canadensis Shrubland

SALIX BOOTHII TEMPORARILY FLOODED SHRUBLAND ALLIANCE
Salix boothii / Calamagrostis canadensis Shrubland
Salix boothii / Carex utriculata - Geum rosii Shrubland
Salix boothii / Mesic Forbs Shrubland
Salix boothii / Mesic Graminoids Shrubland

SALIX BRACHYCARPA SEASONALLY FLOODED SHRUBLAND ALLIANCE
Salix brachycarpa / Carex aquatilis Shrubland
Salix brachycarpa / Mesic Forbs Shrubland

SALIX DRUMMONDIANA SEASONALLY FLOODED SHRUBLAND ALLIANCE
Salix drummondiana / Carex utriculata Shrubland

SALIX DRUMMONDIANA TEMPORARILY FLOODED SHRUBLAND ALLIANCE
Salix drummondiana / Calamagrostis canadensis Shrubland
Salix drummondiana / Mesic Forbs Shrubland

SALIX GEYERIANA SEASONALLY FLOODED SHRUBLAND ALLIANCE
Salix geyeriana / Calamagrostis canadensis Shrubland

SALIX GEYERIANA TEMPORARILY FLOODED SHRUBLAND ALLIANCE
Salix geyeriana / Carex aquatilis Shrubland
Salix geyeriana / Carex utriculata Shrubland

SALIX GEYERIANA SEASONALLY FLOODED SHRUBLAND ALLIANCE
Salix geyeriana - Salix monticola / Calamagrostis canadensis Shrubland
Salix geyeriana - Salix monticola / Mesic Forbs Shrubland
Salix geyeriana / Mesic Forbs Shrubland
Salix geyeriana / Mesic Graminoids Shrubland

SALIX GEYERIANA TEMPORARILY FLOODED SHRUBLAND ALLIANCE
Salix geyeriana - Salix monticola / Calamagrostis canadensis Shrubland
Salix geyeriana - Salix monticola / Mesic Forbs Shrubland
Salix geyeriana / Mesic Forbs Shrubland
Salix geyeriana / Mesic Graminoids Shrubland
Salix geyeriana / Poa palustris Shrubland

Salix ligulifolia-temporarily flooded Shrubland Alliance
Salix ligulifolia Shrubland

Salix lucida-temporarily flooded Shrubland Alliance
Salix lucida ssp. caudata / Rosa woodsii Shrubland

Salix monticola-temporarily flooded Shrubland Alliance
Salix monticola / Angelica ampla Shrubland
Salix monticola / Calamagrostis canadensis Shrubland
Salix monticola / Carex aquatilis Shrubland
Salix monticola / Carex utriculata Shrubland
Salix monticola / Mesic Forbs Shrubland
Salix monticola / Mesic Graminoids Shrubland

Salix planifolia-seasonally flooded Shrubland Alliance
Salix planifolia / Caltha leptosepala Shrubland
Salix planifolia / Carex aquatilis Shrubland
Salix planifolia / Carex utriculata Shrubland
Salix planifolia / Carex scopulorum Shrubland
Salix planifolia / Mesic Forbs Shrubland [Provisional]

Salix wolfii-seasonally flooded Shrubland Alliance
Salix wolfii / Carex aquatilis Shrubland
Salix wolfii / Carex utriculata Shrubland

Salix wolfii-temporarily flooded Shrubland Alliance
Salix wolfii / Deschampsia caespitosa Shrubland
Salix wolfii / Fragaria virginiana Shrubland
Salix wolfii / Mesic Forbs Shrubland

Overview: This system is found throughout the Rocky Mountain cordillera from New Mexico north into Montana, and also occurs in mountainous areas of the Intermountain region and Colorado Plateau. These montane to subalpine riparian shrublands may occur as narrow bands of shrubs lining streambanks and alluvial terraces, or as extensive willow carrs in broad, hummocky floodplains and subalpine valleys.

Characteristic species: The dominant shrubs reflect the large elevational gradient and include Alnus incana, Betula nana, B. occidentalis, Cornus sericea, Salix bebbiana, S. boothii, S. brachycarpa, S. drummondiana, S. eriocephala, S. geyeriana, S. ligulifolia, S. monticola, S. planifolia, and S. wolfii. Generally the upland vegetation surrounding these riparian systems are either conifer or aspen forests.

Environment: This system is more commonly found at higher elevations, but occurs anywhere from 5,600 to 11,800 ft (1,700-3,595 m). Occurrences can also be found around seeps, fens, and isolated springs on hillsides away from valley bottoms. This system often occurs as a mosaic of multiple communities that are shrub- and herb-dominated and includes above-treeline, willow-dominated, snowmelt-fed basins that feed into streams.

Dynamics: Many of the plant associations included in this system are associated with beaver activity, which can be important for maintaining the health of the riparian ecosystem. Beaver dams abate channel down cutting, bank erosion, and downstream movement of sediment. Beaver dams raise the water table across the floodplain and provide year-round saturated soils. Plant establishment and sediment build-up behind beaver dams raises the channel bed and creates a wetland environment.

Variation: At lower elevations in the range of this system, occurrences are more likely to be non-willow shrublands dominated by Alnus incana, Betula occidentalis, or Cornus sericia. At the highest elevations communities dominated by short-statured species such as Betula nana, Salix brachycarpa, S. planifolia, and S. wolfii are most common.

<tr>
<td>Community structure</td>
<td>Species composition is primarily of native species with a diverse physiognomic structure.</td>
<td>Species composition is primarily of native species.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Natural hydrologic regime</td>
<td>Intact, including an unaltered floodplain. No or little evidence of alteration due to drainage, flood control, irrigation channels, livestock grazing, digging, berming, mining, or vehicle use.</td>
<td>Intact or slightly altered by local drainage, flood control, irrigation canals, livestock grazing, digging, mining, vehicle use, or roads. Alteration is easily restorable by ceasing such activities.</td>
<td>Altered by upstream dams, local drainage, diking, filling, digging, mining, or dredging. Alteration is extensive but potentially restorable over several decades.</td>
<td>Not restorable. System remains fundamentally compromised despite restoration of some processes.</td>
</tr>
<tr>
<td>Exotic species</td>
<td>No or very few exotic species present with no potential for expansion.</td>
<td>Few exotic species with little potential for expansion if restoration occurs.</td>
<td>May be widespread but potentially manageable with restoration of most natural processes.</td>
<td>Invasive exotic species may be dominant over significant portions of area, with little potential for control.</td>
</tr>
<tr>
<td>Disturbance</td>
<td>Stream banks are not overly steepened, the channel not overly widened, nor unvegetated by excessive grazing.</td>
<td>Stream banks may show some local deleterious effects from excessive livestock grazing or other human activity.</td>
<td>Stream banks have been severely altered. Vehicle use or grazing disturbance, if present, is extensive and significant enough to have notable impact on species composition and soil compaction, causing excessive erosion.</td>
<td>Disturbance to site not restorable.</td>

<tr>
<td><strong>Landscape Context</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Area hydrology</td>
<td>No evidence of human-caused alteration of hydrology, especially upstream of occurrence and within the watershed.</td>
<td>Little evidence of human-caused alteration of hydrology, especially upstream of occurrence and within the watershed.</td>
<td>Local or moderate human-caused alteration of hydrology may be present, for example small tributary dams or irrigation ditches.</td>
<td>Major human-caused alteration of hydrology. Large dams and numerous diversions are within watershed.</td>
</tr>
<tr>
<td>Surrounding land</td>
<td>Uplands surrounding occurrence and within the watershed are largely unaltered by urban or agricultural uses (&gt;90% natural), and have few to no recent (&lt;20 years) clearcuts (&lt;25% of landscape).</td>
<td>Uplands surrounding occurrence and within the watershed are largely unaltered by urban or agricultural uses (60 to 90% natural), and retain much connectivity. Uplands may be managed forest landscape with limited clearcuts, mining, or numerous roads.</td>
<td>Uplands surrounding occurrence or upstream watershed are fragmented by urban or agricultural alteration (20 to 60% natural).</td>
<td>Uplands surrounding occurrence mostly converted to agricultural or urban uses, including ski area development. Riparian occurrence may be reduced to a narrow strip with a significant edge effect.</td>
</tr>
<tr>
<td>Connectivity</td>
<td>No unnatural barriers present. Connectivity to habitats allows natural processes and species migration to occur.</td>
<td>Few barriers present. Some natural processes such as flooding, may be slightly compromised. No regional dam upstream.</td>
<td>Limited connectivity. Some barriers are present, and natural processes few.</td>
<td>Connectivity and natural processes are nonexistent.</td>
</tr>
